### Thursday, January 22, 2009

8:00 am – 5:30 pm **RFID in Health Care** *Brought to you by:*

Radio frequency identification is delivering a great deal of value in the health-care sector, and this important industry event will offer a unique opportunity to hear leading objective experts and early adopters share real-world case studies revealing the business benefits of this innovative technology. Attendees will learn how to employ RFID to improve patient monitoring and safety, asset tracking, supply chain efficiencies, automated billing and much more--as well as meet the leading technology companies and view their latest solutions.  
*If you are not registered for this event and would like to attend, please visit the registration desk located in the Miranda Foyer.*
