

## Physician Advisor, Tenet HealthCare Corporation Positions Nationwide

Tenet Healthcare Corporation, a national healthcare management company operating in 43 states, is currently seeking a Physician Advisor in several locations nationwide. I will be happy to provide you with additional information on locations and to discuss this or any Physician Advisor opportunity with Tenet hospitals nationwide with you and you may contact me email me directly at [christina1.cater@tenethealth.com](mailto:christina1.cater@tenethealth.com) or call me at 202-329-5244

The Physician Advisor (PA) will be a key member of the hospital's Executive Team and report directly to the hospital CEO and the Group Chief Medical Officer (CMO) and indirectly to the Tenet Physician Advisor Program Director based in Dallas, Texas.

The Physician Advisor (PA) has responsibility for providing medical staff leadership to the Utilization Management Committee (UMC) and functions of the Case Management (CM) and Health Information Management (HIM)/Clinical Documentation Improvement Departments. The PA leads and promotes processes for patients to receive medically necessary and high quality care throughout the continuum of care. In addition, the PA promotes medical care that reflects professional best practices and community standards of care. The PA also assists in reducing the financial risks associated with denials that are due to providing medically unnecessary or preventable services and extended length of stays.

Additionally, the Physician Advisor provides ongoing education and in-service instruction programs for the Hospital's medical staff (including residents and fellows in academic medical centers), nursing and ancillary personnel related to coding/clinical documentation improvement, compliance, and utilization management and quality issues. Further, the PA conducts and documents reviews and for cost and length of stay (LOS) outliers as referred by the non-physician reviewers. He/she conducts medical necessity reviews for cases not referred to an outsourced physician advisor company.

The successful candidate will be currently licensed and board certified and have a demonstrated track record of superior performance in physician leadership roles gained in a complex, multi-hospital care environment and a record of success in clinical process improvement.

It is an exciting time for a physician leader to join an innovative, stable and growing healthcare organization like Tenet which is now the second largest publically traded healthcare company in the country operating in 43 states and internationally with 76 acute care hospitals, 460 outpatient centers, Conifer Health Solutions, 6 health plans, 2,100 employed physicians and 36,000 affiliated physicians. Tenet is committed to a

mission of quality, safety, service and improvement of patient clinical outcomes across the enterprise and our physician executives are critical to the success of that mission.
