

**Industry Leader.** Comprehensive Health Services (CHS) is a nationwide leader in the management of workforce health programs and an innovator in onsite health services, which run on Optic™, a wireless, paperless clinic technology.

**CHS Mission.** To help clients build a healthier, more stable and productive workforce and to reduce and control ever-rising health care costs.

**Background.** Founded in 1975, based in Reston VA, CHS has pioneered and led the growth of the employee health and wellness field over the past 30 years. We have introduced medical best practices, proven methodologies, and advanced technologies to manage our clients' workforce health programs more cost-effectively.

**Resources.** CHS has a total complement of 800 health care professionals – including 50 board-certified physicians, 230 credentialed nurses, and 500 experienced occupational health specialists and subject matter experts in every medical field. We have the very best people in the business, all dedicated to the highest professional standards of service excellence and client satisfaction.

**Service Delivery.** CHS is the only major firm that 1) manages employers' onsite health clinics, 2) provides a national network of physicians and occupational health specialists to serve their local workforces, and 3) mobilizes medical readiness teams to respond to emergencies.

**Nationwide Network.** CHS has an extensive network of 12,000 CHS-credentialed physicians serving clients from 10,000 clinics in all 50 states and Canada to support their many geographically dispersed employees. These physicians are located within 20 miles of nearly all U.S. Postal Zip codes for ease of employee access from near their homes and/or workplaces.

**Medical Research.** CHS is sponsoring groundbreaking medical research with Georgia Tech and Emory University to design the Clinic of the Future. Using the most advanced technology, work flow and clinical practice, this project will maximize the patient experience and set the standard in the industry for design, layout and functionality of onsite health centers. This is the second major research initiative, which began with the development of a new workforce health assessment model to identify and analyze health risks in the workplace. The new

model is currently in use in major corporations, helping them discover cost-effective strategies for risk prevention and reduction as a way of further controlling health care costs.

**Summary of Services.** CHS custom designs and manages workforce health programs with dedication and commitment to the customer experience—the patient, the client and the providers. To meet each client's special business and medical requirements, CHS' solutions may include any of the following:

**Worksite Health Programs** – CHS specializes in staffing, managing and operating onsite health centers with an expanded approach: HybridHealth™—a spectrum of onsite health care services for client employees, retirees and their dependents, including onsite primary care, occupational health and pharmacy services to address acute and chronic health conditions. Our approach is grounded in medical analytics, predictive modeling, reporting. Click here for more details: <http://www.chsmedical.com/ServOnSiteHealth.html>.

**National Medical Exams & Screening** – Pre-placement and post-offer exams, fitness-for-duty exams, medical surveillance, executive exams, independent medical evaluations, travel medicine, drug testing, and more: <http://www.chsmedical.com/ServMedExams.html>.

**Medical Readiness Teams** – CHS has provided emergency medical response to nearly every major world event that has touched our nation, from the September 11 attacks to the Hurricane Katrina disaster. Our ability to respond quickly, meet the challenges and successfully deliver quality medical services for our clients is proven. Click here for more detailed information <http://www.chsmedical.com/ServMedicalReadiness.html>.

These services are available individually, in clusters or as a comprehensive health program – as they share common processes and technology platforms that enable us to deliver fully integrated end-to-end workforce health management solutions.
